Specified Fittings

Specified Fittings was established in 1997 and is one of the major manufacturers of plastic pipe fittings in North America. We produce a full line of PVC and HDPE fittings, from adapters to wyes and everything in between in a range of sizes to meet every need. End configurations are solvent weld, gasket, butt fusion, socket fusion, compression and flange to name just a few. Sample fittings are available on request.

We use the Rieber gasket almost exclusively in our gasketed fittings because it offers a positive seal that is both pressure and vacuum tight, thus preventing rolling or dislocation of the gasket during installation. Composition of the standard gasket is SBR but we also offer EPDM (EP), Viton, nitrile and neoprene—to name a few—for those applications where SBR may be unsuitable because of the characteristics of the fluid to be contained or the properties of the surrounding environment.

Because we are a manufacturing company, we have extraordinary flexibility in what we can produce, whether it is a "one-off" fitting or 10,000 fittings. We can also custom-build a fitting to your individual specifications. Just give us a drawing and/or dimensions and we are confident that we will be able to fabricate a fitting that will meet your exact requirements. Prior to shipment, all our products are inspected to insure the highest standards of quality control and all items are clearly marked with special labels that are waterproof and will not bleed or wash off under adverse weather or ground conditions.

In addition to our own products, we offer a broad-based commodity line including injection-molded HDPE, electro fusion couplings, transition pieces, injection-molded sewer, C907, SDR21 gasketed and PVC DWV that provides you with the convenience of a one-stop purchasing resource.

We have a comprehensive set of illustrated catalogs that are available to our customers and may be ordered in entire sets or individually. The catalogs have been designed to provide the estimator/buyer with detailed information on sizes, availability and technical information to complete an order and answer those frequently asked question. Information that is not available in the catalog may be obtained from any member of our customer service staff who are here to help you from Monday through Friday, between the hours of 6:00 AM and 5:00 PM PST/PDT.

Sincerely,

Your Partners at Specified Fittings
